# UX Design Storyboard

Scenario: An app for busy pet owners that will help track their pet's nutrition, exercise and overall health (big picture)

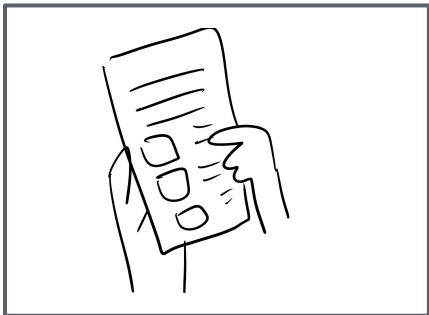

Kiara is a busy student who notices her dog Puff seems tired, but doesn't know why

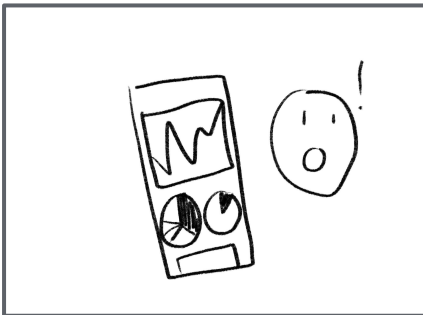

She downloads the PetNutrition app

Next time she feeds Puff, she takes note of the type and amount

She looks up the food on the app, and inputs the data. She repeats this all week.

Kiara is able to see trends over time, and the app helps identify a nutrition deficiency

Puff is happier and healthier, and Kiara is too.
